About Lawrence Essentials

Lawrence Essentials was founded in 2000 and primarily designs, manufactures, and markets unique, high-end resin accessories to retailers, hotels, restaurants, event planners, floral designers, interior design, and architectural firms. Since in business, LE has created exclusive designs for both hospitality and retail and continues to ensure that client's special project needs are met. All of our designs are limited only to our client's imagination. Barbara Kling one of the principals of LE was in the fashion industry for 17 years. Barbara, formerly the president of John Henry, Henry Grethel and Perry Ellis says "LE is still fashion and function just the material has changed."

Our Web site will include up to date designs that can be seen in the "New Design" section of the site (www.LawrenceEssentials.com). All images on the site can be clicked on to enlarge and reveal style numbers and descriptions. Please contact us for selection and availability of colors and finishes.

PRODUCT CARE INFORMATION

Lawrence Essentials resin designs are food safe and waterproof. All designs are dishwasher friendly, except for our frosted, espresso and ombre colors. Should a piece become scratched, use a nonabrasive pad (such as a Scotchbrite or Dobie pad) with warm water and mild soap. Resin sometimes can become frosted after dish washing. If this occurs, simply rub a tiny drop of vegetable oil onto the surface of the piece and wash with soap and water to restore its luster. As resin is not fire resistant, **a glass insert must ALWAYS be used with a lit candle. Please note that flames cannot touch resin. The flame must be below the glass insert.** Certain vases can be used as candle holders/hurricanes as long as a glass holder is between the candle and resin. Make sure the flame of the candle is below the glass rim.

Lawrence Essentials unique designs are strong and durable, but need to be cared for. Each LE piece goes through a series of shaping, moulding, hand carving and polishing steps. Slight imperfections found on LE finish is characteristic of the process used and since LE is handcrafted, no two pieces are exactly alike. Please forward this information to anyone who handles our product. Call or email us for any other questions you might have about our products, and inquire about sales clinics.
